PROFESSIONAL SUMMARY

Software Engineer with 6+ years of experience building scalable, high-performance applications in Unity and C# across XR, mobile, and web platforms, with additional experience in TypeScript and React through R&D work and personal projects.

Specialized in API integrations, AI-powered features, and performance optimization.

Experienced in translating functional requirements into technical solutions, improving development workflows through automation and tooling, and collaborating across multidisciplinary teams, with a strong focus on code quality and system reliability.

EMPLOYMENT HISTORY

XR Engineer, Cornerstone On Demand
(formerly Talespin)

Utrecht

May 2023 — Dec 2025

- Contributed to a cross-platform B2C application supporting both web and VR, working primarily in Unity and C#, with 3+ years of hands-on experience developing for Meta Quest and Quest 2
- Collaborated on features for both web and VR environments, integrated external plugins, and developed API endpoints
- Extended an abstracted input system to support Meta Quest passthrough and hand tracking, enabling new XR capabilities without impacting shared web and VR application logic
- Contributed to a JavaScript implementation for lip sync; explored R&D projects using React Three Fiber, TypeScript, and WebGPU
- Led performance optimization efforts, including CPU and memory profiling, VR asset optimization, and maintaining CI/CD pipelines through Jenkins
- Designed and built a reusable AI integration layer for virtual humans, supporting multiple providers behind a common interface, including Azure Speech and Whisper for speech-to-text, Azure Speech and ElevenLabs for text-to-speech, and both the standard and Realtime OpenAI APIs for conversational AI
- Developed a custom Unity Editor tool to automate migration to a new asset pipeline, including asset export, validation, and backend API integration

HOBBIES

Powerlifting, tinkering with technology, gaming, and building personal projects.

LANGUAGES

English

Dutch

Unity Developer, Layers (formerly AR-Producties)

Amsterdam

2019 — 2023

- Developed B2B AR applications across multiple platforms, including HoloLens, Unreal Glasses, and mobile AR, handling both application logic and UI development
- Owned features and projects end-to-end, from design through implementation and delivery, in an early-stage startup environment
- Worked on interactive features, shaders, and internal tools to support development and deployment
- Created AR filters for social platforms like Snapchat and Instagram
- Mentored interns, supported product demonstrations at trade fairs, and temporarily managed the development team during a colleague's leave
- Focused on performance optimization to ensure smooth experiences across platforms, and built reusable Unity packages to improve workflow efficiency

Manager, Domino's

2016 — 2021

- Trained and mentored employees to maximize team performance
- Managed customer complaints with calm, clear communication
- Collaborated with team members to achieve target results
- Set goals, delegated tasks, provided feedback, and addressed performance issues

Database manager, Sponsormail

2013 — 2015

- Managed and maintained database information, ensuring data was accurate, up-to-date, and well-organized for easy access and retrieval
- Provided support to users interacting with the database

EDUCATION

Game Development, Hogeschool, van Amsterdam

2014 — 2020

Followed an additional semester in game architecture and design

HAVO, Jan Arentsz

2008 — 2014

INTERNSHIPS

Unity Developer, AR-Producties

Amsterdam

Sept 2019 — Feb 2020

XR developer. Worked on an internal project related to navigation using AR. Also worked on multiple social filters, and did event work.

Unity Developer, Hogeschool, van
Amsterdam

Amsterdam

Sept 2016 — Feb 2017

Worked on a VR project in Unreal Engine. Worked with clothing designers to showcase clothing in an interactive VR experience.
